EXPERIENCE

CITRUS PAYMENTS | SOFTWARE ENGINEERING INTERN

May 2015 – Jul 2015 | Pune, India

- Rewrote Citrus.js to integrate checkout page with Citruspay payment gateway, in CoffeeScript using revealing module design pattern. The result was 45% reduction in overall size of codes.
- Wrote Ruby and Python scripts for implementing Citrus Wallet.

PROJECTS

BALERT

Sep 2015 | Python

Gives voice notification whenever the charge of your battery becomes low. User has an option to set custom warning messages, percent charge level and select between English, Hindi and Tamil as one of the notification languages. Published at PyPi Github

WALLNOTE

Oct 2015 - Present | Python

Converts wallpaper into an “editable white board” enabling users to write notes with changes being reflected immediately. Currently, the project is under development Github

CODE2PDF

Sep 2015 | Python

Console app cum Python module to convert given source code into PDF file with the options for more than 20 syntax highlighting themes, custom PDF sizes and line formatting. Github

TOPCODER-DL

Oct 2015 | Python

Console app to efficiently download all the algorithm tutorials from Topcoder and save them locally as PDF files for offline reading. Github

BLOGULAR

Aug 2015 | AngularJS

A simple Blog generator which takes article contents as JSON data and generates a decent blog. Github

SMART BUS

Oct 2015- Present | Internet of Things Lab, National Institute of Technology, Trichy

To find ETA of the public transport buses, seats availability and display at every bus stop. The goal is to minimise the overall cost incurred with feasible solution.

AWARDS
